Fission Uranium Corp.

Notes to the condensed interim financial statements
For the six month period ended June 30, 2019
(Expressed in Canadian dollars)
(Unaudited)

1. Nature of operations

Fission Uranium Corp. (the "Company" or "Fission Uranium") was incorporated on February 13, 2013 under the laws of the Canada Business Corporations Act in connection with a court approved plan of arrangement to reorganize Fission Energy Corp. which was completed on April 26, 2013. The Company's principal business activity is the acquisition and development of exploration and evaluation assets. To date, the Company has not generated revenues from operations and is considered to be in the exploration stage. The Company's head office is located at 700 – 1620 Dickson Ave., Kelowna, BC, V1Y 9Y2 and is listed on the Toronto Stock Exchange under the symbol FCU, on the U.S. OTCQX under the symbol FCUUF, and on the Frankfurt Stock Exchange under the symbol 2FU.

The Company has not yet determined whether its exploration and evaluation assets contain ore reserves that are economically recoverable. The recoverability of the amounts shown for the exploration and evaluation assets, including the acquisition costs, is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves, and upon future profitable production.

2. Significant accounting policies

(a) Statement of compliance

These condensed interim financial statements are unaudited and have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, IAS 34, *Interim Financial Reporting* ("IAS 34") and do not contain all of the information required for annual financial statements. These unaudited condensed interim financial statements should be read in conjunction with the Company's audited annual financial statements for the year ended December 31, 2018 prepared in accordance with IFRS. These unaudited condensed interim financial statements were authorized for issue by the Board of Directors on August 12, 2019.

(b) Basis of presentation

These unaudited condensed interim financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value. Certain comparative figures have been reclassified to conform with the current period presentation.

(c) Significant Accounting Policies

The accounting policies followed in these condensed interim financial statements are consistent with those disclosed in note 2 of the Company's financial statements for the year ended December 31, 2018, except as noted below.

(d) New standards adopted by the Company

IFRS 16 – Leases

The Company adopted IFRS 16 - Leases effective January 1, 2019. In accordance with the transition provisions in IFRS 16 - Leases, the new rules have been adopted using the modified retrospective approach whereby the cumulative effect of initially applying the new standard is recognized on January 1, 2019. Comparatives for the 2018 reporting period have not been restated.

Fission Uranium Corp.

Notes to the condensed interim financial statements
For the six month period ended June 30, 2019
(Expressed in Canadian dollars)
(Unaudited)

2. Significant accounting policies (continued)

(d) *New standards adopted by the Company (continued)*

IFRS 16 - Leases (continued)

On the adoption of IFRS 16 - Leases, the Company recognized lease obligations in relation to leases which had previously been classified as "operating leases" under the principles of IAS 17 - Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the Company's estimated incremental borrowing rate as of January 1, 2019.

Effective January 1, 2019, the Company adopted IFRS 16 - Leases which resulted in the initial recognition of right-of-use assets and lease obligations of \$331,360.

Leases

At the inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company assesses whether the contract involves the use of an identified asset, whether the Company has the right to obtain substantially all of the economic benefits from the use of the asset during the term of the arrangement and if the Company has the right to direct the use of the asset.

Leases are recognized as a right of use asset and a corresponding obligation when the leased asset is available for use by the Company. Lease obligations are initially measured at the net present value of the fixed lease payments and variable lease payments that are based on an index or a rate, discounted using the rate implicit in the lease, or if that cannot be determined, the Company's estimated incremental borrowing rate. Right of use assets are initially measured at cost, comprising the amount of the initial measurement of the lease obligation, any lease payments made at or before the lease commencement date, and restoration costs.

Right of use assets are depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. Lease obligations are subsequently measured at amortized cost using the effective interest rate method.

Fission Uranium Corp.

Notes to the condensed interim financial statements
For the six month period ended June 30, 2019
(Expressed in Canadian dollars)
(Unaudited)

3. Key estimates and judgements

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(a) *Investments in associates*

The application of the Company's accounting policy for investments in associates requires judgement to determine whether any objective evidence of impairment exists at each reporting date giving consideration to factors such as: significant financial difficulty of the associate, or a significant or prolonged decline in the fair value of the investment below its carrying value.

(b) *Exploration and evaluation assets*

The application of the Company's accounting policy for exploration and evaluation assets requires judgement in the following areas:

- (i) Determination of whether any impairment indicators exist at each reporting date giving consideration to factors such as budgeted expenditures on the Patterson Lake South ("PLS") property, assessment of the right to explore in the specific area and evaluation of any data which would indicate that the carrying amount of exploration and evaluation assets is not recoverable; and
- (ii) Assessing when the commercial viability and technical feasibility of the project has been determined, at which] point the asset is reclassified to property and equipment.

4. Short-term investments

	June 30 2019	December 31 2018
	\$	\$
Guaranteed investment certificates ("GICs")	-	10,000,000
Fission 3.0 Corp. warrants	147,832	500,984
	147,832	10,500,984

In September 2018, Fission 3.0 Corp. ("Fission 3.0") issued the Company 4,000,000 warrants as a result of the Company's participation in a private placement financing (Note 5).

Fission Uranium Corp.

Notes to the condensed interim financial statements
For the six month period ended June 30, 2019
(Expressed in Canadian dollars)
(Unaudited)

5. Investment in Fission 3.0 Corp.

Fission 3.0 is a company incorporated in Canada, whose principal business activity is the acquisition, exploration and development of uranium resource properties in Canada and Peru. The Company, through a combination of its shareholding and its common directors and management, has significant influence over Fission 3.0 and accounts for the investment using the equity method.

Due to the fact that Fission 3.0's financial statements are typically not publicly available at the time the Company files its financial statements, the share of Fission 3.0's results are recognized using a reporting period which is three months prior to that of the Company.

Details of the investment in Fission 3.0 are as follows:

	\$
Balance, January 1, 2018	2,017,311
Purchase of 4,000,000 units @ \$0.10 per unit	400,000
Dilution gain on investment in Fission 3.0	29,412
Share of loss for the twelve months ended September 30, 2018	(168,424)
Write-down on Investment in Fission 3.0	(1,164,525)
Balance, December 31, 2018	1,113,774
Share of loss for the six months ended March 31, 2019	(109,925)
Balance, June 30, 2019	1,003,849

On April 30, 2018, Fission 3.0 completed a consolidation of its issued and outstanding common shares (the "Pre-Consolidation Shares") on the basis of one (1) new Common Share (the "Post-Consolidation Shares") for every four (4) Pre-Consolidation Shares held (the "Share Consolidation"). As a result of the Share Consolidation, the Company held 6,792,602 Post-Consolidation common shares.

As at June 30, 2018, the continued, prolonged decline in the fair value of the investment in Fission 3.0 was considered to be objective evidence of impairment under *IAS 28, Investments in Associates and Joint Ventures*. Accordingly, the carrying value of the investment was written down by \$1,164,525 to its fair value based on the quoted market price of Fission 3.0's common shares.

On September 28, 2018, Fission 3.0 completed the first tranche of a non-brokered private placement financing by issuing 52,050,000 units at a price of \$0.10 per unit, and 9,800,000 Flow Through Shares at a price of \$0.10 per share. Each unit consisted of one common share and one share purchase warrant exercisable at \$0.15 per warrant until September 28, 2021. The Company purchased 4,000,000 units for a total cost of \$400,000, which resulted in its ownership being diluted down to 9.24% and the Company recognizing a dilution loss of \$29,813 during the three month period ended September 30, 2018.

The Company determined that the fair value of the Fission 3.0 warrants acquired was \$317,724, which is based on the Black-Scholes option pricing model. Since the fair value of this financial instrument exceeded the transaction price of the unit offering, and the fair value is not based solely on observable inputs, this amount has been recognized as a deferred gain which will be recognized over the three year life of the warrants. The fair value of the warrants will be determined at each reporting date, and gains or losses on the fair value changes will be recognized in the statements of loss and comprehensive loss each period.

Fission Uranium Corp.

Notes to the condensed interim financial statements
For the six month period ended June 30, 2019
(Expressed in Canadian dollars)
(Unaudited)

5. Investment in Fission 3.0 Corp. (continued)

During the three month period ended December 31, 2018, Fission 3.0 completed two additional non-brokered private placements by issuing an aggregate of 25,014,550 units and Flow Through Shares. As a result, the Company's ownership was further diluted to 7.61% and the Company recognized a dilution gain of \$59,225.

For the six month period ended June 30, 2019 the Company recognized \$52,954 (June 30, 2018 - \$nil) of the deferred gain on the Fission 3.0 warrants. The balance of remaining deferred gain at June 30, 2019 was \$238,293 (December 31, 2018 - \$291,247). The Company determined that the fair value of the warrants at June 30, 2019 was \$147,832 (December 31, 2018 - \$500,984) and therefore recognized an unrealized loss of \$353,152 (June 30, 2018 - \$nil) based on the fair value change. The net loss of \$300,198 (June 30, 2018 - \$nil) was recorded within other items in the statements of loss and comprehensive loss.

The trading price of Fission 3.0's common shares on June 28, 2019 was \$0.10 (December 31, 2018 - \$0.205). The quoted market value of the investment in Fission 3.0 on June 30, 2019 was \$1,079,260 (December 31, 2018 - \$2,212,483).

Fission 3.0's comprehensive loss for the periods below is as follows:

	Six months ended March 31 2019	Twelve months ended September 30 2018
	\$	\$
Comprehensive loss for the period	(1,444,478)	(1,324,646)

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of title and/or ownership of claims. The Company has investigated title to all of its exploration and evaluation assets, and to the best of its knowledge, title to its property is in good standing.

On January 11, 2016 the Company executed an offtake agreement with CGN Mining Company Limited ("CGN Mining"). Under the terms of the offtake agreement, CGN Mining will purchase 20% of annual U₃O₈ production and will have an option to purchase up to an additional 15% of U₃O₈ production from the PLS property, after commencement of commercial production.

	\$
Beginning balance, January 1, 2019	331,360
Lease obligation payments	(54,252)
Interest expense	7,839
Net lease obligation payments	(46,413)
Ending balance at June 30, 2019	284,947
Less: Lease obligations - current portion	(96,484)
Lease obligations	188,463

The Company's lease obligations relate to commercial office space utilized by the Company's offices in Kelowna and Vancouver. The Company's estimated incremental borrowing rate used in the calculation of these obligations is 5.95%.

9. Share capital and other capital reserves

(a) *Authorized share capital*

The Company is authorized to issue an unlimited number of common shares, without par value. All of the Company's issued shares are fully paid.

(b) *Stock options*

The Company has a stock option plan which allows the Board of Directors to grant stock options to employees, directors, officers, and consultants. The exercise price is determined by the Board of Directors provided the minimum exercise price is set at the Company's closing share price on the day before the grant date. The options can be granted for a maximum term of five years and vesting terms are determined by the Board of Directors at the date of grant.

As at June 30, 2019, incentive stock options were outstanding as follows:

Stock options			
Number outstanding	Exercise price	Number of vested options	Expiry date
	\$		
6,190,000	1.00	6,190,000	December 15, 2019
11,675,000	0.85	11,675,000	February 5, 2021
7,325,000	0.85	7,325,000	January 16, 2022
300,000	0.85	200,000	March 27, 2023
25,490,000		25,390,000

9. Share capital and other capital reserves (continued)

(b) Stock options (continued)

Stock option transactions are summarized as follows:

	Number outstanding	Weighted average exercise price \$
Outstanding, January 1, 2018	46,365,000	1.0278
Granted	500,000	0.8500
Forfeited	(66,667)	0.8500
Expired	(453,333)	1.1357
Outstanding June 30, 2018	46,345,000	1.0251
Forfeited	(531,668)	0.8500
Expired	(9,178,332)	0.9706
Outstanding, December 31, 2018	36,635,000	1.0412
Expired	(11,145,000)	1.4000
Outstanding, June 30, 2019	25,490,000	0.8900

(c) Share-based compensation

All options are initially recorded at fair value using the Black-Scholes option pricing model. During the six month period ended June 30, 2019 the Company granted Nil stock options (June 30, 2018 - 500,000). Pursuant to the vesting schedule of options granted, during the six month period ended June 30, 2019 share-based compensation of \$13,372 (June 30, 2018 - \$289,934) was recognized in the statements of loss and comprehensive loss and \$1,777 (June 30, 2018 - \$66,975) was recognized in exploration and evaluation assets. The total amount of \$15,149 (June 30, 2018 - \$356,909) was recorded within other capital reserves in the statements of changes in equity.

The following assumptions were used for the valuation of share-based compensation for options granted:

	June 30 2019	June 30 2018
Risk Free Interest Rate	N/A	1.91%
Expected Life - Years	N/A	2.92
Estimated Forfeiture Rate	N/A	3.83%
Annualised Volatility	N/A	50.53%
Dividend Rate	N/A	N/A
Weighted average fair value per option	N/A	\$0.16

10. Supplemental disclosure with respect to cash flows

	June 30	December 31
	2019	2018
	\$	\$
Cash and cash equivalents		
Cash	5,502,559	10,783,396
Redeemable term deposits	3,010,000	160,000
	8,512,559	10,943,396

During the six month period ended June 30, 2019 the Company received \$248,520 (June 30, 2018 - \$215,666) in interest income.

Significant non-cash financing and investing transactions for the six month period ended June 30, 2019 included:

- (a) Incurring \$209,543 of exploration and evaluation related expenditures through accounts payable and accrued liabilities;
- (b) Recognizing \$22,276 of exploration and evaluation related expenditures through prepaid expenses; and
- (c) Recognizing \$1,777 of share-based payments in exploration and evaluation assets.

Significant non-cash financing and investing transactions for the six month period ended June 30, 2018 included:

- (a) Incurring \$1,035,438 of exploration and evaluation related expenditures through accounts payable and accrued liabilities;
- (b) Recognizing \$21,034 of exploration and evaluation related expenditures through prepaid expenses; and
- (c) Recognizing \$66,975 of share-based payments in exploration and evaluation assets.

11. Related party transactions

The Company has identified the CEO, President and COO, CFO, VP Exploration, and the Company's directors as its key management personnel.

	2019	2018	2019	2018
	\$	\$	\$	\$
Exploration and administrative services billed to Fission 3.0, a company over which Fission Uranium has significant influence	125,738	28,003	283,094	64,732

The Company has a Directors Remuneration Plan (the "DRP Plan") whereby a portion of director fees can be paid through the issuance of common shares ("Director Remuneration Shares") in lieu of the payment of cash or other means of remuneration. Included in compensation costs is the value of shares issued under the DRP Plan. During the six month period ended June 30, 2019, the Company issued 251,728 shares with a total value of \$120,000 under the DRP Plan (June 30, 2018 - 172,669 shares valued at \$127,500).

Included in accounts payable at June 30, 2019 is \$19,962 (December 31, 2018 - \$25,145) for wages payable and consulting fees due to key management personnel and companies controlled by key management personnel.

Included in amounts receivable at June 30, 2019 is \$60,907 (December 31, 2018 - \$87,770) for exploration and administrative services and expense recoveries due from Fission 3.0.

Transactions with CGN Mining, which is deemed to be a related party as it accounts for its investment in the Company as an investment in associate, have been disclosed in Note 7.

On September 28, 2018, the Company purchased additional units of Fission 3.0 for a total cost of \$400,000 (Note 5).

These transactions were in the normal course of operations.

12. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue exploration and development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company depends on external financing to fund its activities. The capital structure of the Company currently consists of common shares and stock options.

Changes in the equity accounts of the Company are disclosed in the statements of changes in equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or debt or dispose of assets. The issuance of common shares or issuance of debt requires approval of the Board of Directors.

The Company reviews its capital management approach on an on-going basis and updates it as necessary depending on various factors, including capital deployment and general industry conditions. The Company anticipates continuing to access equity markets to fund continued exploration and development of its exploration and evaluation assets and the future growth of the business.

Fission Uranium Corp.

13. Financial instruments and risk management

IFRS 13, Fair Value Measurement, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments consist of cash and cash equivalents, short-term investments, amounts receivable, and accounts payable and accrued liabilities. Cash and cash equivalents and GICs within short-term investments are recorded at amortized cost. The Fission 3.0 warrants within short-term investments are stated at fair value through profit or loss ("FVTPL") for subsequent measurement purposes and classified within Level 2. Carrying values for amounts receivable and accounts payable and accrued liabilities are considered to be a reasonable approximation of fair value due to the short-term nature of these instruments.

The Company's financial instruments are exposed to a number of financial and market risks, including credit, liquidity and price risks. The Company does not currently have in place any active hedging or derivative trading policies to manage these risks since the Company's management does not believe that the current size, scale and pattern of its operations warrant such hedging activities.

(a) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will not discharge its obligations, resulting in a financial loss to the Company. The Company has procedures in place to minimize its exposure to credit risk. Company management evaluates credit risk on an ongoing basis including counterparty credit rating and other counterparty concentrations as measured by amount and percentage.

The primary sources of credit risk for the Company arise from:

- (i) Cash and cash equivalents;
- (ii) GICs included in short-term investments; and
- (iii) Amounts receivable

The Company has not had any credit losses in the past, nor does it expect to have any credit losses in the future. At June 30, 2019, the Company has no financial assets that are past due or impaired due to credit risk defaults.

The Company's maximum exposure to credit risk is as follows:

	June 30	December 31
	2019	2018
	\$	\$
Cash and cash equivalents	8,512,559	10,943,396
Short-term investments (GICs)	-	10,000,000
Amounts receivable	667,360	311,230
	9,179,919	21,254,626

Fission Uranium Corp.

(Expressed in Canadian dollars)
(Unaudited)

13. Financial instruments and risk management (continued)

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations with respect to financial liabilities as they fall due. The Company's financial liabilities are comprised of accounts payable and accrued liabilities. The Company frequently assesses its liquidity position by reviewing the timing of amounts due and the Company's current cash flow position to meet its obligations. The Company manages its liquidity risk by maintaining sufficient cash and cash equivalents balances to meet its anticipated operational needs.

The Company's accounts payable and accrued liabilities arose as a result of exploration and development of its exploration and evaluation assets and other corporate expenses. Payment terms on these liabilities are typically 30 to 60 days from receipt of invoice and do not generally bear interest.

The following table summarizes the remaining contractual maturities of the Company's financial liabilities:

	Maturity Dates	June 30 2019	December 31 2018
		\$	\$
Accounts payable and accrued liabilities	< 6 months	391,519	1,094,156
		391,519	1,094,156

(c) Price risk

Price risk is the risk that assets or liabilities carried at fair value or future cash flows of a financial instrument will fluctuate because of changes in market conditions.

The Company's maximum exposure to price risk on its Fission 3.0 warrants included in short-term investments based on the fair value hierarchy is as follows:

	June 30 2019	December 31 2018
	\$	\$
Level 2	147,832	500,984
	147,832	500,984
